Maths Week Focus

We follow the White Rose Maths scheme across all year groups.

We also use Numbots and TT Rockstars for children to practise their maths skills at home.

In Pre-School children are working on recognising numbers to 5 and above. As part of this, they have enjoyed going on a number hunt around Pre-School.

In Reception the children are practising recalling number bonds to 5 and to 10.

They have all just received their Numbots log ins so they can practise their maths skills at home.

Well done to all those children who have already logged on!

In Year 1 the children are currently learning about length and height. They have been enjoying measuring different items around the classroom using non-standard units such as cubes. This week they have gone onto measuring in centimeters. Lots of children in Year 1 have also been very busy completing challenges on Numbots!

In Year 2 the children have been learning their 10 times tables and are busy practising on TTS Rockstars.

Next they will be learning their 2 and 5 times tables.

EYFS and KS1 Support links

White Rose have a 1-minute Maths app that you can use to help to support children's learning at home.

<https://play.numbots.com/#/intro>

In Year 3 the children are consolidating their Year 2 times tables as well as practising the 3, 4 and 8 times tables.

In Year 4 the children are getting ready for their multiplication test. The children have been busy practising their times tables all the way up to 12 x 12. All the children have got their own set of times tables flashcards to practise at home. Below are some links you could use to support your child with their times tables.

Year 2, 3 and 4 link <https://www.topmarks.co.uk/maths-games/hit-the-button>

To help support your child's maths progress children in Year 2, 3 and 4 can use TT Rockstars. There is a battle set for today until after the Easter holidays!

Year 5 have been working on finding and converting fractions, decimals and percentages. Although children found this tricky, it has been made much easier by having a secure understanding of their multiplication facts, which we focussed on last year. There are some games online that can support children with their understanding.

In preparation for SATs, Year 6 have been working hard consolidating their understanding of Fractions, Decimals and Percentages. As a class, we have cooperatively supported each other in these areas: Ordering, Equivalent, Finding an amount and missing value. Over recent years, the percentage of FDP questions for SATs has risen from 14% in 2018 to 26% in 2024 therefore we are prioritising this as a focus area of Maths since many marks can be gained. Please use the website links below to support your child's learning and confidence working on FDP.
