This week Pre-School have been practising and then taking part in the annual Sports Day races. They enjoyed an egg and spoon race, bunny jumping, balancing and running. Even though it was a bit rainy at times, they worked hard and really enjoyed the activities!

On Wednesday Reception really enjoyed Sports Day. They showed lots of resilience in all the different races. After, they had lots of fun making their own medals!

This week, Year 1 enjoyed taking part in their Sports Day field events run by Year 6. Children had a go at a range of activities that tested their throwing, jumping and balancing skills and despite the rain, had smiles on their faces throughout.

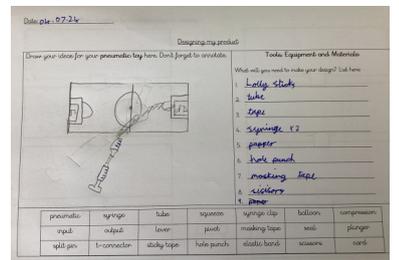

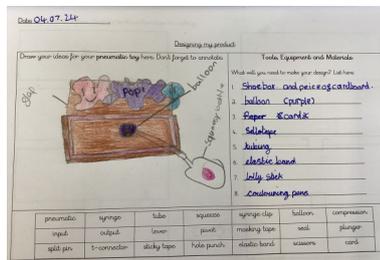

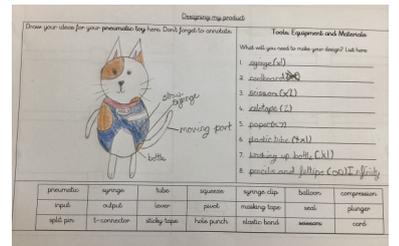

This week, Year 2 enjoyed their Sports Day. We used lots of the skills that we developed during our PE lessons. It was a great afternoon and we showed great sportsmanship.

Year 3 have been working super hard to create their books for next week's Booknic event. They have spent a long time creating these and are eager to share them with their families.

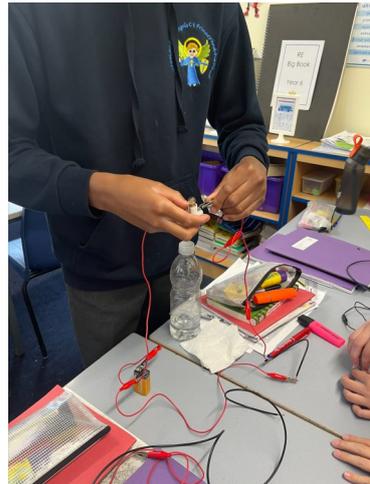

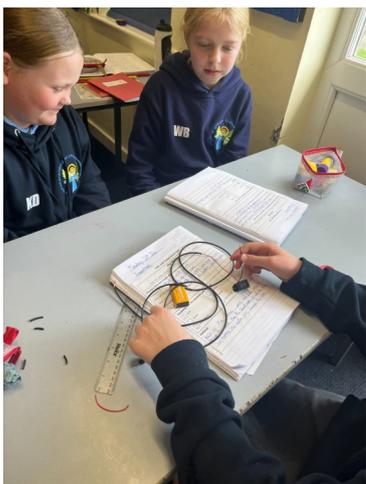

Year 4 have been learning about pneumatics this half term. We have explored how to make things move using air, and have tried to think of how we can use these in our own toy designs. We planned out how we wanted our project to move and drew up design plans. Here are a few of our amazing ideas.

Twelve children from Year 5 travelled to The Shay Stadium for the Safe Travel Cup final. They showcased the musical which the whole class have worked very hard on. Although we did not win, we all had a fun time creating and performing the musical for the school and their grown ups. Well done Year 5!

Year 6 have been conducting a science experiment this week to determine 'if the length of a wire in a circuit affects the brightness of a bulb, the speed of a motor or the volume of a buzzer'. We worked carefully to cut different lengths of wire to complete our circuits and make sure it was a fair test.

Many of us concluded that when the wire was longer, the lightbulb was dimmer.
