Columba 61

This week in Pre-School, we have been exploring cornflour, sand and water outside in the lovely sunshine. We have also done lots of mark making with chalk. It has been a very messy week!

Reception have been learning about life under the sea. After, they created their own fish out of clay.

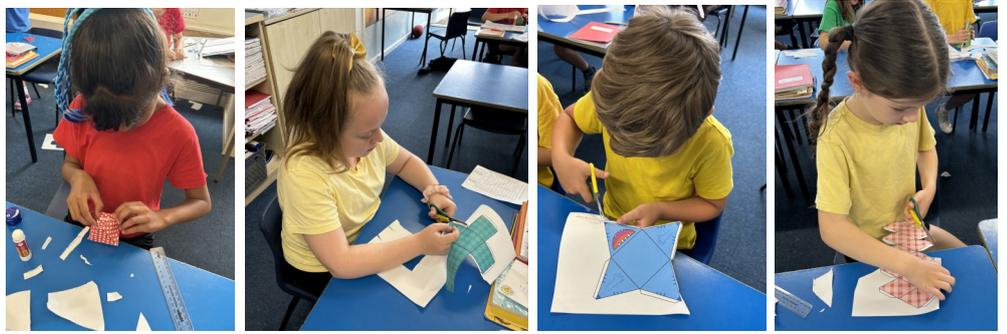

Year 1 enjoyed a visit to Shelf woods as a part of our Geography topic this week. During the walk we thought about all the things we could see, smell, feel and hear and used this to help us complete our work back at school.

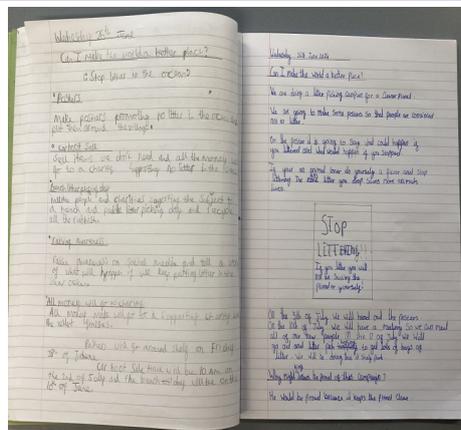

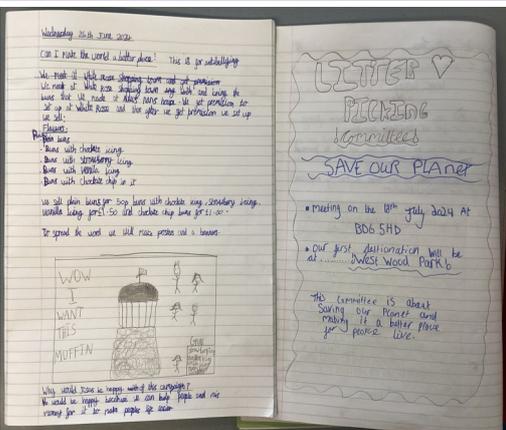

Year 2 had a fabulous trip to the beach. We enjoyed playing together, riding the donkeys and having an ice cream. It will be a trip we will remember for a very long time. The weather was lovely and everyone had a wonderful time.

This week in Maths, Year 3 have been learning the names and the properties of 3D shapes. We built a variety of shapes. Some children showed great resilience by putting together a 20 sided shaped called an icosahedron.

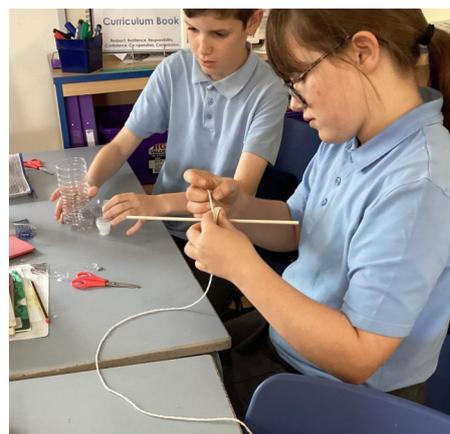

Year 4 have been learning about pneumatic systems in their DT unit. We have been exploring how to connect tubing to a bottle and a balloon, so that the balloon will inflate. We are going to use this knowledge to help us plan and create moving toys next week.

In RE, Year 5 have been looking at what kind of a king Jesus was and what type of world he would have wanted to rule. This week, we split into groups and designed campaigns that would aim to make the world a better place. The children had lots of ideas including litter picking, anti-bullying campaigns and bake sales.

For our DT project, Year 6 completed a lesson based on creating their own well using a pulley system. Pupils needed to show cooperation whilst working together, as well as resilience to overcome any problems they had. They loved creating their own wells and controlling a new mechanism, Year 6 are now looking forward to creating their own controllable car.

**Health and Wellbeing**

Brooke is our out of school star for achieving her cubs badges.
