This week in Pre-School, we have been exploring different textures by sorting them into groups. We have been focusing on our fine motor skills whilst problem solving with the nuts and bolts as well as practising our scissor skills. We have also been counting objects with increasing accuracy.

This week during outdoor learning, Reception have been busy practising for sports day. We are really looking forward to it!

This week, in Year 1 we have been using the paintings of Giuseppe Arcimboldo to create our own fruit faces. We used a collage technique to do this and stuck pieces of fruit to create different facial features.

This week in Year 2 we have been learning to jump and land in different ways. We set up a range of different activities for us to practise our skills. We made sure that we were jumping and landing using the proper technique.

This week, Year 3 have been using the computers to research Portugal ready for the Euro Celebration day next week. They especially liked finding out more about Cristiano Ronaldo!

Year 4 have been exploring classification keys in Science this week. We looked at how to sort living things, by answering questions about their characteristics. Each question needed a yes or no answer. The children worked in groups to build up their classification keys.

After lots of practise, Year 5 performed their musical for both KS1 and KS2 during assembly. They thoroughly enjoyed themselves and made sure that the message of travelling both safely and sustainably came across. They look forward to sharing with their grown ups next week.

Year 6 took part in an online Kooth lesson which focused on preparing them for High school. The children spoke about worries they may have about their upcoming transition, and discussed how they can support themselves over the holidays. The children found this very beneficial and it gave them suggestions of things to reflect on and got them to think about adults/resources they may use before leaving St. Michaels.
