This week in Pre-School we have been finding out all about spiders. We made spiders in the creative area, caught them in the water tray and searched for spider webs outside. We found lots glistening in the rain! We have also explored a very messy, Autumn sensory tray.

Year 1 have completed their second 'talk through story' book this week. We have been thinking carefully about what happens in the story 'Six Dinner Sid' and looked at the different key words in the story. We all really enjoyed joining in with the book.

Year 5 have been looking at chemical changes this week. They did an experiment which involved making bubbling cauldrons by adding bicarbonate of soda, vinegar and food colouring. Reception enjoyed coming to watch and seeing a real scientific experiment taking place.

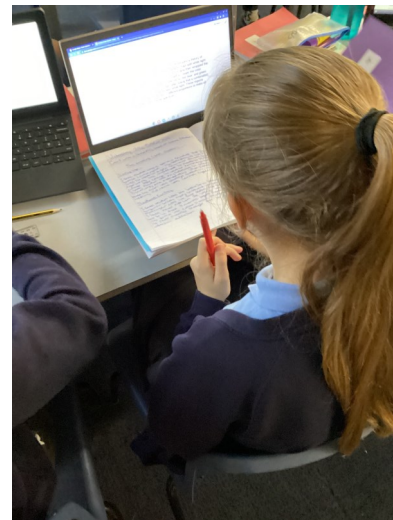

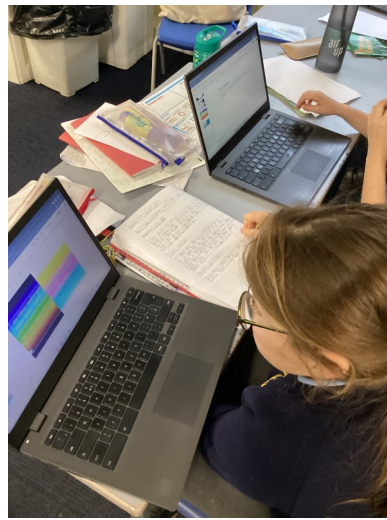

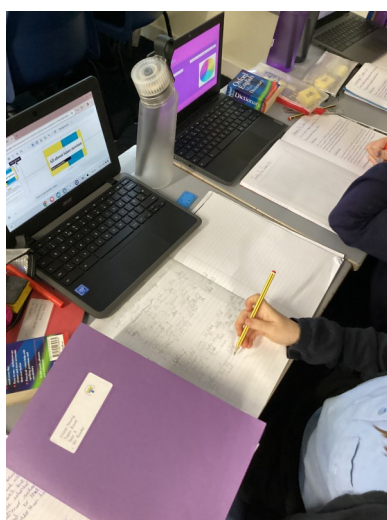

Year 2 have been looking at aerial photographs in geography and seeing what human and physical features we can spot. We had lots of fun working together to find different landmarks. We then used Google Earth to see the features in 3D.

Year 3 have been working on controlling a small ball in PE. They have been practising walking whilst bouncing and catching the ball.

Year 4 have been working on movement and balance in their PE work this half term. This week we played some games to test how well we could balance and to see how much our skills had developed. We tried different techniques to improve our balance, thinking about the position of our arms, legs and head. Many of us are much better at static balance that we were 8 weeks ago.

Year 6 have been creating and publishing their own biography's based on the Scientist Isaac Newton. We focused on making sure our writing was informative, cohesive and we had an expert tone.
