

Aiden 98

Bede 117

Chad 120

Columba 88

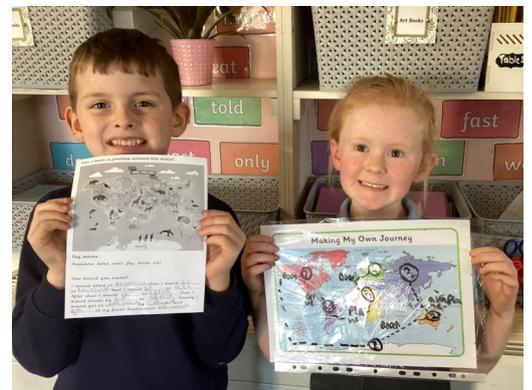

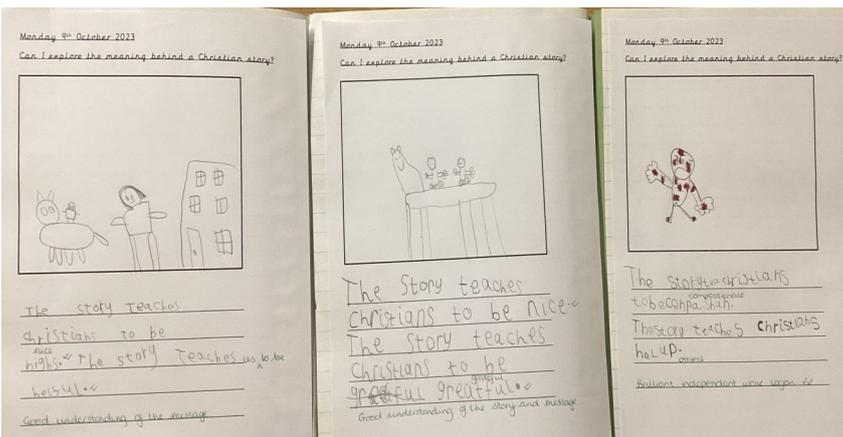

In Pre-School this week we have been finding out about Harvest and thanking God for our food. We made scarecrow pictures and had lots of fun playing outside with Autumn leaves and conkers.

Reception have been learning about the composition of number 4. They enjoyed watching Numberblocks and making their own Numberblock to show number 4.

Year 1 have been looking at a story from the Bible in RE called 'The Parable of the Good Samaritan'. We talked about the different messages within the story and what values it teaches Christians to follow. Here are some of our thoughts on the story:

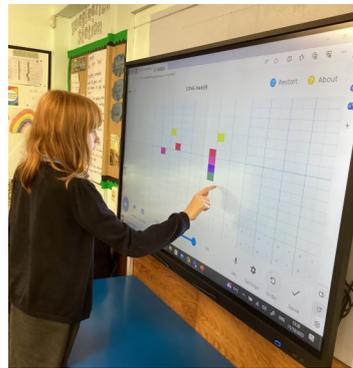

This week Year 2 have been planning a trip around the world. We used a map to draw our route, using journey lines, making sure we travelled to all 7 continents. We then used this to write a description of our journey.

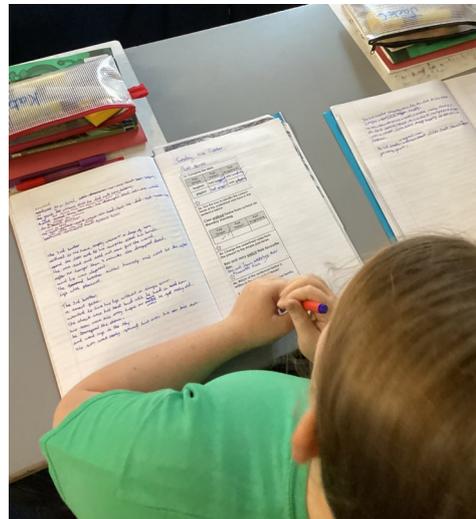

In science Year 3 were investigating if having longer femurs meant you could jump further. We made a prediction, planned a fair test and made a conclusion. We found it interesting that the tallest children didn't always have the longest femurs.

In Computing Year 4 analysed a website and identified the key parts. They considered what content can be added to websites and what factors they should consider before adding content to a website. They then used a website which enabled them to create their own content online.

Year 5 have been looking at internet safety this week. This has included how to be safe using the internet as well as how what you say online can have just as much of an impact as what you say in person. This also led to us looking at our digital footprints.

Year 6 have written their own narrative poems this week in English based on the Tale of the Three Brothers. We have focused on making sure our poems are written in chronological order, are cohesive and include similes, metaphors and rhyming words.
