----------	---------	---------	------------

This week in Pre-School we have been sorting foods into different food groups and talking about healthy foods. We have also made our very own musical instrument shakers using cardboard tubes, rice and lentils.

This week in Reception we have been learning about different sea creatures. We have enjoyed learning lots of new facts and new vocabulary. The children created their own paperchain octopus!

To start our new plant science topic, in Year 1 we have planted our own beans and will track these each week until we break up. We talked about how important it is for plants to have soil, water and sunlight to help the plant gather nutrients. We are looking forward to seeing whose grows the tallest!

This week Year 2 have been learning about germination, we discussed what it means and how this is similar to how we grow. We enjoyed seeing how Miss Stewart had changed from a newborn to an adult. We then planted our own cress seeds to show the process in action.

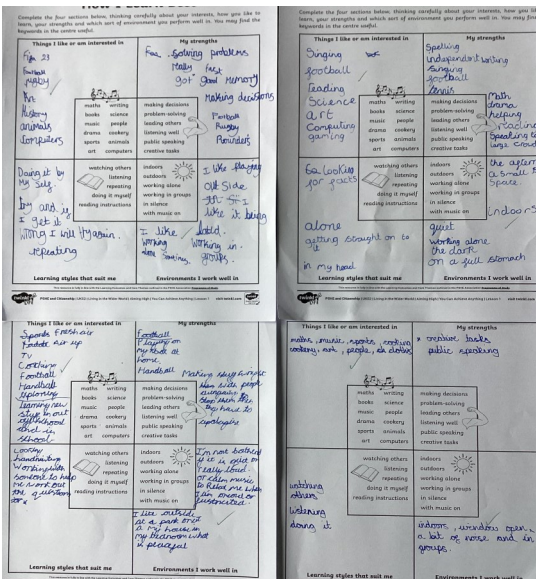

Year 3 have started their new Maths topic of Time. This is proving quite tricky so far for some children, and they are needing to be resilient during these lessons. Telling the time is a skill they can practice at home as remember; practice makes progress!

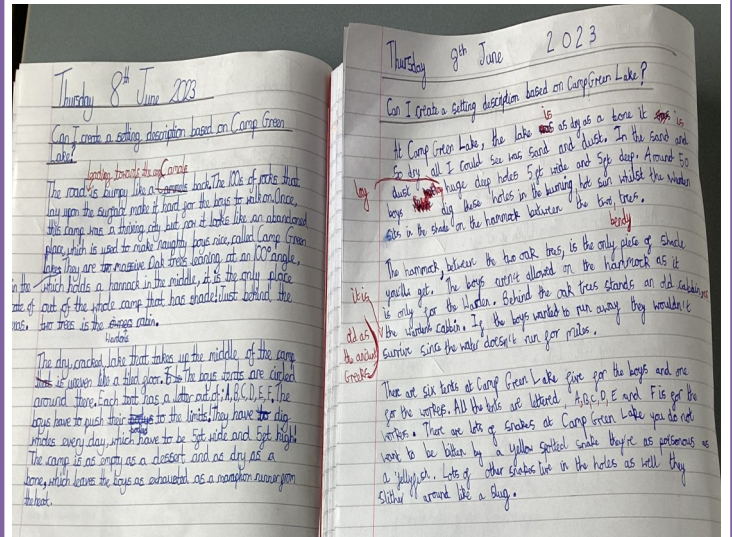

Year 4 have had a busy week working hard on their times tables and have completed their multiplication check. The children have developed their confidence with multiplication facts throughout the year and this is a vital skill for maths in KS2 and beyond. Well done to everyone! We have also begun making our friendship bracelets ready for our enterprise event this term. Lots of resilience was shown to make these. These will be available to purchase from School Money later this month (more details to follow).

Year 5 are starting to learn about businesses in PSHCE and what it takes to run a successful enterprise. We have started off by looking at ourselves and trying to understand our own interests and how we learn best.

Year 6 this week began their new book in English 'Holes'. The book is set in Texas at Camp Green Lake, we have created our own setting description of what it looks like for Stanley Yelnats!

Health and Wellbeing

This week Year 1 started their gardening club after school to help look after our school grounds and plant some produce in the process. For our first session we decided to spruce up our playground area by planting lots of colorful flowers including violas and sunflowers. We even potted some tomato plants to keep in our classrooms. Next week we will be moving onto planting lots of vegetable seeds in our garden planters. This will help us to learn about foods that keep us healthy as well as how to look after different plants.
