Pre-school have been working in our nature garden investigating leaves, conkers, apples, plums and sticks. We have compared all the different sizes using great mathematical language.

Reception enjoyed going on a walk to Shelf woods this week. We looked for signs of Autumn and collected lots of leaves which we have used for our artwork in school.

Year 1 have been on a trip to Shelf Woods today to look at the signs of Autumn for our Science topic. Although we got wet, we had a brilliant time exploring. We are really looking forward to visiting again in the summer!

In Year 2 we have been planning a trip around the world just like Phileas Fogg. We created a route that took us across the world stopping in all 7 continents and gave instruction using compass directions to explain the route we had taken.

Year 3 are really enjoying learning the Ukelele. They have been taught how to pluck and strum several different notes. Their favourite song to play is 'My dog has Fleas'. However, they are beginning to learn a pop song to perform as a group; Ho Hey by The Lumineers which sounds really lovely.

Year 4 have been working on different ways to travel in PE building coordination skills. We have also been working on our balance. We had to move an item from one place on the floor to another by balancing on one leg. These children worked hard to keep their balance, thinking about where to position their raised leg.

Year 5 have had a fun week reflecting on our adventures at Winmarleigh Hall. They have written a descriptive piece talking all about the experience and which parts were their favourite - the campfire was very popular!

Year 6 began their new class novel 'The tale of the Three Brothers.' We deepened our understanding of the text by using drama to perform what happens to the brothers. Year 6 showed a good understanding of the plot and the different characters.
