Chad 773

Columba 80

The newsletter this week comes from Year 5. The majority of the class have been on a residential to Newby Wiske Hall Adventure Centre. Thank you to Miss Barnes and Mrs Piper who have led this trip and given up their time to give our children this opportunity. It looks like they've have a great time!

Some children have been working on a magical door project. They have explored different types of doors and discussed where they might lead. They then designed and made their own magical doors. They thought about where their doors would lead and then created maps. They have also been using problem solving and cooperations skills to complete some building challenges with construction resources.

Lots of cooperation and communication skills needed as we did giant paddle boarding. Some very wet children but all with big smiles!

Archery was very popular and it was very competitive across the groups. Some children even hit the centre of the target more than once.

Laser tag in the woods - despite a valiant effort from the red team, Miss Barnes led the blue team to victory. Mrs Piper won't take it personally that the whole blue team surrounded her at the end and she was helpless against their well coordinated plan to eliminate her.

Nerves of steel were needed to complete the huge climb up the wooden pole to the platform at the top. Then a leap of faith into the air to touch a suspended ball. Our children are fearless!

There will be a full round up of all the pictures from Year 5's residential on their class page. Click the link [here](#).
