

### Safer Internet Day

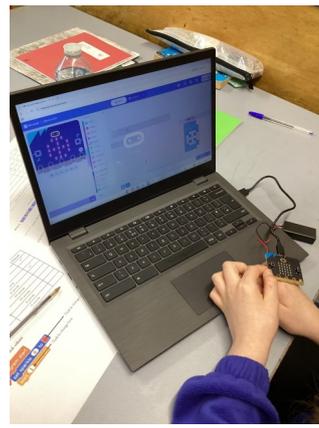

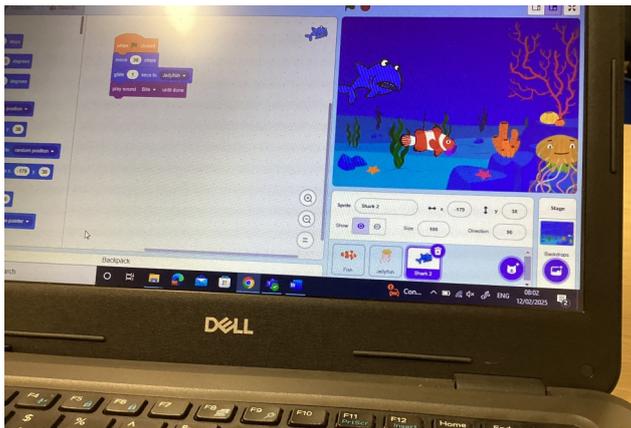

Safer Internet Day took place on Tuesday this week and was a chance for our pupils to focus on different aspects of online safety. This years topic, was based around the theme: Too good to be true? Protecting yourself and others from scams online has provided our pupils the opportunity to learn about the potential scams and the importance of sharing personal information whilst online. Every year group, this week has adapted their computing lesson around this current topic.

At St Michaels, we aim to equip pupils with the skills and understanding of how to use technology safely and appropriately so that they know how to keep themselves safe online.

We teach children that they have a duty of care to both themselves and others when using technology, and that when you are online you leave a digital footprint.

Celebrating Safer Internet Day has been a great opportunity for us to re-emphasise the online safety messages we deliver throughout the year. If you have any concerns or questions about keeping your child safe online, please do get in touch with your child's class teacher, our Pastoral Team or our Computing Lead - Mr Barker.
