A World Of Learning

This week, our school has been buzzing with geographical curiosity! Geography is such a wonderful part of our curriculum. It helps children make sense of the world around them, understand diverse places and cultures, and recognise how landscapes, environments, and people are beautifully interconnected. Through maps, research, exploration, and fieldwork, geography encourages children to think critically, ask big questions, and develop a lifelong fascination with the world.

We are excited to share just a few highlights from across the school this week. Our pupils have been busy exploring continents, capital cities, oceans, natural wonders, and even practising their French at the same time! Their enthusiasm has been fantastic, and we hope you enjoy seeing what they've been learning.

Mrs Berry

Pointing In The Right Direction — Year 1

Year 1 have been learning all about **compass points**, confidently using north, south, east and west in their geography work. Some children were so inspired that they went off to the Creative Area and made their very own compasses — wonderful independent learning in action!

They are now working hard to remember the **four countries of the United Kingdom** and their **capital cities**. Brilliant work, Year 1!

Ge Day Learning — Year 4

Year 4 have immersed themselves in the amazing country of **Australia**. The children shared some brilliant reflections:

“I liked learning about Australia and the Great Barrier Reef.”

“I liked learning about how Australia is different to England.”

“Learning about the animals that live in Australia was very interesting.”

It's been fantastic to see their curiosity grow as they compare continents, climates, landscapes and wildlife.

Canyon Quest — Year 6

During their Geography topic on the **USA**, Year 6 have been investigating one of the world's greatest natural wonders — the **Grand Canyon**.

They discovered how millions of years of erosion carved this incredible landmark in northwest Arizona.

In lessons, they recreated erosion on a smaller scale using practical investigations, then wrote detailed scientific explanations in their books. What impressive geographers they are becoming!

Bonjour Geography – Year 5

Year 5 have taken geography global and multilingual! In their French lessons this week, they revisited their geography knowledge by locating **continents and countries** on a world map — but with a twist:

The questions were asked in French... and they had to reply in French too!

A brilliant example of cross-curricular learning at its very best.

Around The World – Year 2

Year 2 have been exploring the **continents and oceans of the world**. Martha particularly enjoyed learning the catchy song that helps everyone remember their names!

They also studied **Norway**, discovering interesting facts about life there.

Charlotte was fascinated to learn that people in Norway eat a lot of fish.

The children compared Norway's physical and human features with those in our own local area — excellent geographical thinking!
